

Hamza Alkhaldi

Bahraini | +973 33436090 | alkhaldihamza06@gmail.com | LinkedIn | GitHub

EDUCATION

American University of Bahrain | Riffa, Bahrain **Sep 2023 – Present**

B.S. in Computer Science, College of Computing & Engineering | cGPA: 3.5

- Peer Tutor for Data Structures & Programming, Calculus I-II, Physics and Composition I-II

Reboot Coding Institute | Seef, Bahrain **Apr 2025 – Present**

Full-Stack Development Program

- Selective, project-based 01Edu diploma in full-stack development, networking and databases (Go, JavaScript, Rust)

TECHNICAL SKILLS

Languages: Go, Java, Kotlin, Python, JavaScript, C++ (Arduino), SQL, HTML/CSS
Frameworks & Libraries: Jetpack Compose, React Native, Flask, PyTorch, Hugging Face Transformers, scikit-learn
Cloud & Tools: Microsoft Azure, Firebase, Docker, Git, SQLite, Figma, Confluence

PUBLICATIONS

H. Alkhaldi, H. Wahban, M. Khan, "*A Comparative Study of Fine-Tuned MARBERTv2 for Arabic Dialect Identification on the IADD Benchmark*", IEEE ETECOM 2026 (oral presentation), Paris, France, Oct. 2026. To appear in IEEE Xplore.

RELEVANT EXPERIENCE

Batelco by Beyon | Mobile Development Intern *(Industrial Trainee)* **Jul 2026 – Sep 2026**

- Resolved 60 P1/P2 functional bugs and UI/UX enhancements across 10 feature areas of Batelco's customer-facing Android app (Kotlin, Jetpack Compose), contributing to the launch of the app's major revamp project
- Led a cross-platform localization audit across Android, iOS, and Confluence spanning thousands of keys, using AI-assisted tooling (Claude Code, Cursor) to script comparisons and resolve mismatches
- Authored object-level API value-tracing documentation for the payment gateway across every purchasable flow, adopted directly by the team building the app's major revamp

PROJECTS

SmartCool – Occupancy-based Smart A/C Control | 2nd Place / 250+ **GSR Hackathon 2026 – KFUPM**

ESP32 (Arduino C++), Python, Flask, Machine Learning, IoT Sensors

- Built an occupancy-aware ESP32 A/C controller with a live Flask dashboard; won SAR 20,000 in the Energy Track
- Trained prediction models on 240 real homes, projecting ~10% A/C energy savings in simulated Saudi villas

GateKeep - Cloud Vehicle Access Control System **American University of Bahrain**

Python, Microsoft Azure (Functions, AI Vision, SQL Database, Blob Storage, App Service, Entra ID)

- Deployed a serverless OCR pipeline that reads plates, validates against Azure SQL, and logs access via RBAC
- Achieved 100% validation success with VNet/NSG isolation; benchmarked 3.7s warm latency at ~$26/month

Real-Time Forum **Reboot Coding Institute**

Go, WebSockets, SQLite, JavaScript

- Built a single-page real-time forum (Go backend, JS frontend) with WebSocket-based live private messaging, registration/login, posts, comments, and categories
- Implemented live online/offline presence, throttled 10-message chat pagination, and bcrypt-hashed session auth

LEADERSHIP & ACTIVITIES

- Head of IT, ISCMUN II: designed and built the conference website, reaching 5,000+ visits
- 4x Best Delegate and 2x Best Speaker across Model United Nations conferences in Bahrain
- Event Ambassador, Google Developer Group DevFest Manama: managed attendee flow and event logistics
